DESCRIPTION

The Model PHONEBLASTER/28 is a comprehensive multimedia communications system that sets a new standard for performance, convenience and ease of use. Microsoft™ Phone lets you create a centralized message center, complete with speakerphone, answering machine and fax capabilities. So you can be as productive away from your PC as you are in front of it. Use the SuperVoice™ application to set up voicemail/email mailboxes, transfer large files or send faxes from your computer at killer 28.8kbps speeds. Plug and Play compatibility makes installation a snap.

Microsoft™ Internet Explorer means that you can access the internet using the best browser available for Windows 95. WebPhone™ gives you an internet telephone with integrated voicemail. What's more, the included full-duplex speakerphone and genuine Sound Blaster® 16 audio provides crystal-clear, hands-free conversations. Transform your PC into a complete multimedia communications center with PHONEBLASTER/28.

Telephone Management Capabilities

- Unified message box lists voicemail, faxes, recorded conversations and files received
- Integrated phonebook includes voice, fax and pager numbers, in addition to mailing and email addresses
- Caller ID support
- Pager notification of new messages
- Tollsaver support
- Remote access allows constant communication with Phone Blaster away from the office

Fax Support

- Fax-on-demand and fax forwarding
- Signature and logo support for quick faxes
- Automated cover sheet generation
- Rotating, scaling, zooming, half-toning and edge-smoothing
- PCX, TIFF & BMP support

Voice Support

- Full-featured, full-duplex speakerphone with echo cancellation provides uninterrupted, clear communication between parties
- Voicemail sending
- Primary & secondary outgoing greetings
- Microphone/handset switching for recording and speaker/handset switching for playback
