

Model TST8000 Series

TapeStor 8000 Travan TR-4 Internal Tape Drive

FEATURES

- **Low Cost Per Megabyte**
- **Ideal for Inexpensive Daily, Weekly or Long Term Data Storage Needs**
- **Capacities up to 8 Gbytes with software data compression**
- **Backup Rates 30MB Native and 60MB Compressed per minute maximum**
- **Back-up Exec Software**
- **MTBF Rates of 200,000**
- **Error Rate 1 per 10¹⁵**

DESCRIPTION

TapeStor 8000 tape drives offers cost-effective, compact tape backup systems for Windows95 and DOS/Windows environments, with a native capacity of 4 Gbytes and a compressed data capacity of up to 8 Gbytes. The drives are read-compatible with most QIC (quarter-inch-cartridge) standards back to QIC-80 (250 Mbytes). TapeStor 8000 are available with software for a number of operating system formats, both desktop and network. Performance is unequalled in this market, with up to 30 Mbytes per minute in native mode and up to 60 Mbytes per minute in compressed mode. FastSense technology enables the drive to provide the best performance in any configuration by matching system speed to that of the drive. The drives come in a choice of interface, either SCSI or ATAPI. Designed for years of trouble-free

operation, each of these drives has industry-leading reliability, with an MTBF (Mean Time Between Failure) rate of 200,000 hours.

These drives provide a better price/performance point than any other tape technology, including DAT, DC6000 or 8mm technologies. In addition, the drive is packaged in a 3.5- by 1-inch form factor, so that it will fit in any standard drive bay.

Backup Exec for Windows 95 V2.0, comes with a time-saving, disaster-recovery feature. This new backup application takes full advantage of Windows 95 32-bit architecture including multitasking and multithreading capabilities and is fully compatible with all internal Travan Tape Storage Systems.

SPECIFICATIONS

Key Buying Points

This tape drive has a 2:1 compression ratio.
Maximum data transfer rates up to 60 Mbytes per minutes. MTBF rates of 200,000 hours.

Manufacture Warranty

2 years.

Minicartridge Support

Travan TR4 4\8gig
QIC-Wide 2\4gig
Quarter Inch 1.6\3.2gig

Performance

Data transfer - 600 Kbytes\sec
Read\Write (ips) 92/69/46
Search\Rewind 100ips

Backup Rate

30Mbytes\min - native
60Mbytes\min - compressed

Recording Method

QIC-3095 (TR-4), QIC-3080, QIC-Wide, Quarter Inch.
Read Only Compatiablity - QIC-3020, QIC-3010, QIC -80System

System Requirements

Interface required Bay size (internal) 5.25 HH (comes w\ casing) & Other Requirements-SCSI Interface or ATAPI Interface

ORDERING GUIDE

Model TST8000RABET

ATAPI Tape drive, Backup Exec software, Data cable, 1 Data Tape

Model TST8000RSBET

SCSI Tape drive, Backup Exec software, Data cable, 1 Data Tape
