

Model DFE Series

Fast Ethernet Hubs

FEATURES

- **IEEE 802.3u 100BASE-TX Class II Repeater**
- **Choice of Stand-Alone or Stackable**
- **Utilization %, Collision, Unit ID LEDs**
- **Per-Port LEDs for Auto-Partition, Link/Rx**
- **UTP/STP Support for Each Port**
- **Compact and Lightweight**
- **Uplink Port Provided**
- **Internal Universal Power Supply**

DESCRIPTION

These hubs are designed for entry-level users of high-bandwidth networking. The device's small size and economical cost guarantee a smooth entrance into a hardware arena normally requiring a bigger outlay of investment.

The hubs are designed for the simpler network where no statistic monitoring or complex configuration is required. Servers and workstations are connected through a simple plug of the RJ-45 jack to the network. Each hub's front panel provides full diagnostic LEDs for visual monitoring and troubleshooting. LED indicators include port auto-partitioning, data reception, port link status, segment collisions and segment utilization percentage.

DFE-812TX+

The DFE-812TX+ is a stackable Fast Ethernet hub designed for departmental workgroups that require no network management yet envision possible future expansion. Up to 6 hubs can be gradually stacked together to accommodate growth on a per-need basis. Users can start with as few as 12 high-bandwidth ports, then add hubs to obtain the maximum 142 ports on the network.

The stackable design permits users to overcome the intrinsic limitation of Class II repeaters. With up to 72 ports per stack, users can maximize port density to 142 without exceeding the permitted repeater count. Each hub has two daisy-chain connectors on the back through which the hubs are stacked together via a daisy-chain cable.

DFE-808TX+

This hub provides 8 Fast Ethernet ports and presents the most economical choice. It is most suitable for connecting a small workgroup to a high-bandwidth network.

- Network Media
- UTP Category 5
- EIA/TIA-568 100-ohm shielded twisted pair (STP)

ORDERING GUIDE

Model DFE-808TX+

8 port Fast Ethernet Hub

Model DFE-812TX+

12 port stackable Fast Ethernet Hub
