- Weighs only 12.1 pounds
- Plug & Play+ compatibility
- Exceeds Energy Star® and TCO standards
- Low power consumption

DESCRIPTION

Technology at its greatest! ViewSonic® is now offering their new active matrix LCD flat panel VP140 ViewPanel. The ViewPanel's new LuCiD™ technology produces sharp, clear images and extraordinary brilliance. The VP140 displays a full 14" viewable area which is larger than the viewable area of a traditional 15" monitor. With a depth of 2.5" and a mere 12.1 pounds, the VP140 weighs only a fraction of standard CRT displays while using 90% less desktop space. The revolutionary VP140 can be configured for both desktop or slim line

wall displays. With a maximum resolution of 1,024 x 768 at 75Hz refresh, the ViewPanel is ideal for corporate business, medical, government and financial environments. ViewSonic's VP140 LCD display supports up to 16.7 million color images in VGA, SVGA and XGA pixel formats for PC environments. OnView® controls provide user friendly adjustments with the push of a button. The ViewPanel supports Plug & Play+ and exceeds Energy Star® and TCO standards.
